

## **EPICORE ECUADOR S.A. TECHNICAL SEMINAR IN NEW PENINSULA SITE**

On November 23, 2017, Epicore Ecuador S.A. hosted a seminar for technical support and guidance due to the current disease outbreak arising in the Ecuadorean aquaculture industry. The seminar came from the initiative of our Technical & Commercial Latin American Manager, Fabrizio Vanoni. The seminar, held in our new Peninsula Site, was attended by approximately 200 attendees from 65 local hatcheries.

A guest speaker was Mexican Technical Manager Ing. Alfonso Martinez Ochoa, from Maricultura del Pacifico, one of the most important hatcheries in Mexico. Ing. Martinez has vast experience of working with Ecuador larvae species under high pathogenic conditions. His presentation included topics such as: Results from Maturation and Genetics, Basic Good Practices Guidelines, Presentation of Larviculture, Maturation and Raceways as well as other topics of interests. After the presentations a forum was conducted where many attendants raised questions about feeding concepts, maturation, biosecurity, and local sanitary formatives. After the seminar EESA Administrative Manager, Lorena Vanoni, toasted the inauguration of the new site. Guests enjoyed hors d'oeuvre and were able to discuss their specific technical issues with our international guest.

**ALFONSO MARTINEZ WITH THE MODERATORS: FREDDY CHERIGO (TIBALLOSA HATCHERY), RAFAEL VERDUGA (TEXCUMAR HATCHERY), GUSTAVO GARCIA (PESCANOVA HATCHERY)**
